

Interim Navigation on the Golden Spike Trail System

PLEAA has begun posting trail signs along the new Golden Spike Trail System. We have reached a point where we are able to provide *interim* navigation aids to enable OHV users to navigate trails on parts of the system.

Bright green trails show trails with trail signs completed. Labels show the trail numbers.

Red trails show loop trails that begin and end at the staging area and ride Golden Spike Trail System different trails in a loop.

Gray trails are valid county roads that will be signed during the signing project and will be assigned trail numbers.

GPS icons on the maps show the location of GPS stickers along the trail. These show GPS coordinates for that location.

Typical trail signs have:

- 1) A trail system logo
- 2) Trail direction arrow
- 3) Trail number
- 4) DNR/PLEAA sticker

GPS stickers, if posted, will be at the bottom of the trail sign
